

Play Structure Instructions

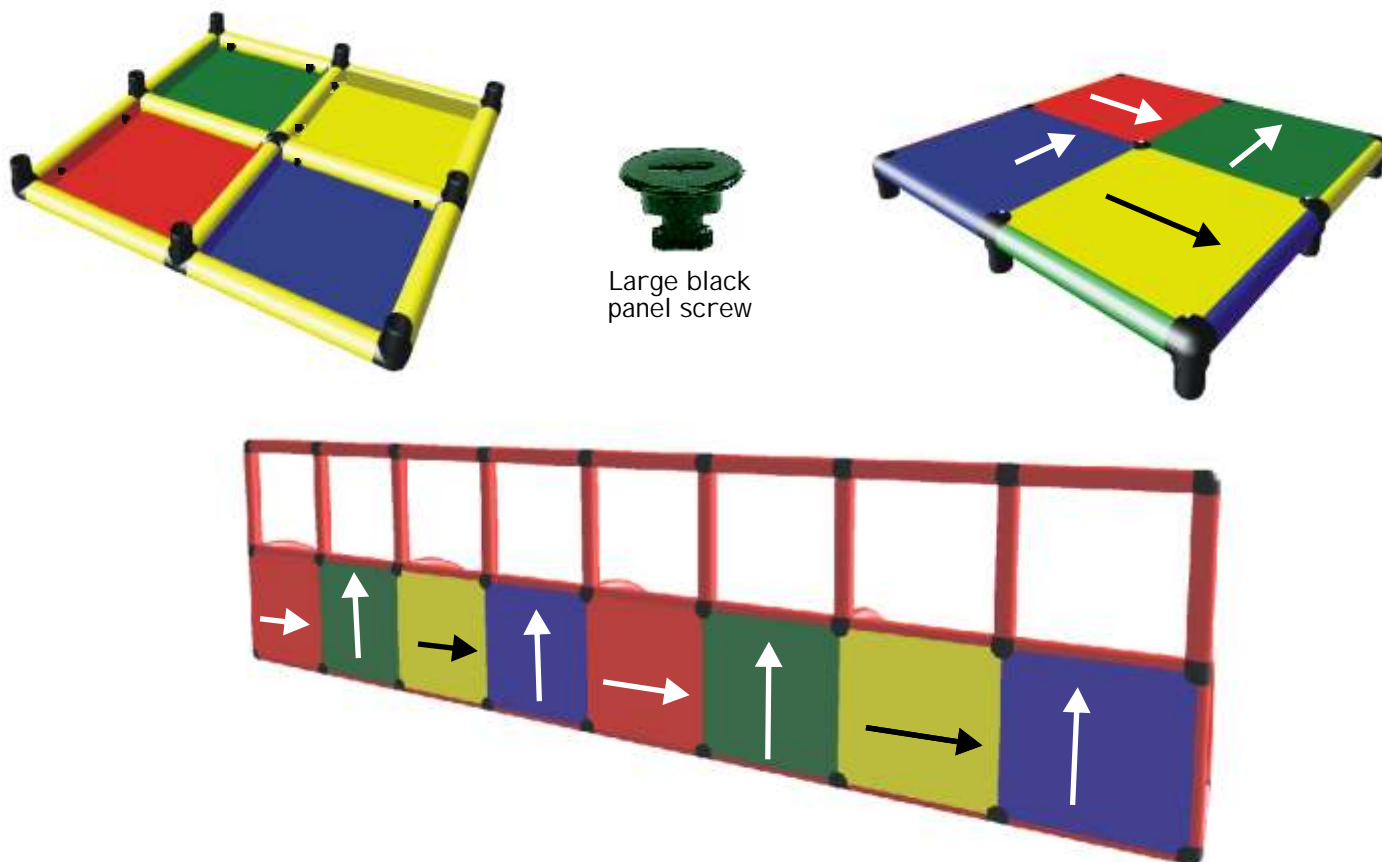

PANELS - BASIC

Tubes & Panels

1. Each standard tube has 2 holes
2. Each standard panel has 4 holes. You must secure all 4 panel holes with large black panel screws

To ensure all 4 panel holes are secured, rotate the tubes and panels as required.

Then use regular colored tube screws to fill in any left over tube holes

Large black
panel screw

The large (40x40cm) panels are usually set with the smooth side "out" and the screws on the inside

Tight Screws?? All tubes and panels are manufactured to the same tolerances. If you have any problems inserting a panel screw, check to make sure holes are completely aligned. You may need to move tubes/panels slightly. We use the technical term "jiggle"
